Name of Student: SAYAN PAUL

Batch: 2025-29

CANDIDATE'S DECLARATION

I, **Sayan Paul**, do hereby declare that the internship report titled “Community Animal Welfare, Shelter & Relief Initiative” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name: SAYAN PAUL

Roll No.: 25scs1003003051

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program at the Kalpajyoti Foundation. I am deeply thankful for their aspiring guidance, invaluable constructive criticism, and friendly advice during this work. I would like to extend a special note of thanks to the NGO founder, Mr. Sayan Saha, for his hands-on mentorship in the field.

I express my gratitude to my parents for their blessings.

Student Name: SAYAN PAUL

Internship Completion Certificate

	KALPAJYOTI FOUNDATION An Eternal Flame of Selfless Service	Registered under Sec 8(1), Companies Act, 2013 Govt. Of India SEC 8 LICENCE NO:121645 Headquarter: Dhubri, Assam, India Pin:783301
Date: 08-07-2026		
<u>CERTIFICATE OF INTERNSHIP</u>		
This is to certify that Mr. Sayan Paul, a student of IILM University, Greater Noida, has successfully completed a One-Month Summer Internship at Kalpajyoti Foundation from 02 June 2026 to 06 July 2026. During the internship, he was an active part of various community development and animal welfare initiatives undertaken by the Foundation. He participated in fundraising campaigns, awareness drives, community outreach programs, and social service activities. He also took part in dog shelter welfare initiatives by helping provide food and water pots for stray dogs, participating in feeding drives, and contributing to fundraising efforts for the care and well-being of rescued and stray animals. Throughout the internship, he demonstrated excellent teamwork, leadership potential, creativity, and a strong sense of responsibility. He consistently took initiative, contributed innovative ideas, worked collaboratively with fellow volunteers, and played an important role in the successful execution of various programs and events. His dedication, enthusiasm, communication skills, and commitment to social service made him a valuable member of the Foundation. His performance throughout the internship was highly satisfactory, and we sincerely appreciate his valuable contribution to the organization. We wish him every success in his future academic and professional endeavors.

4 Project Description

4.1 Introduction

Stray animals face severe challenges in urban environments. Lack of access to clean drinking water, safe shelter, and consistent nutrition frequently leads to starvation, dehydration, and distress. This internship project focused on a grassroots community initiative to build street dog houses, establish water stations, distribute food, and assist in fundraising campaigns to sustain the welfare of the voiceless.

4.2 Organization Profile

Kalpajyoti Foundation is a non-governmental organization (NGO) dedicated to community service and animal welfare. The foundation mobilizes volunteers on the ground to construct shelters and distribute food and water to stray animals. It actively raises civic awareness regarding the humane treatment of street animals and relies on a decentralized, community-supported model—including local shopkeepers, residents, and digital donation drives—to sustain its operations.

4.3 Problem Statement

During peak weather extremes, street animals lack access to clean drinking water and dry shelters. Furthermore, without a structured system, the daily nutritional and medical needs of these animals are often ignored. The absence of a centralized fund for animal care means that relief efforts often rely on scattered, inconsistent individual efforts.

4.4 Project Objectives

- **Shelter Installation:** To install weatherproof “Street Dog Houses” at key locations to protect strays from extreme weather.
- **Water Stations:** To establish and maintain clean drinking water stations using earthen bowls to keep water naturally cool.
- **Food Distribution:** To conduct regular food distribution drives, providing packed meals to street dogs as well as people in need.
- **Fundraising & Sustenance:** To actively assist in fundraising initiatives through scan-to-donate QR code campaigns, supporting the NGO’s

core pillars: food & nutrition, medical care, shelter & safety, and love & compassion.

- **Community Engagement:** To encourage local shopkeepers and residents to participate in the daily refilling of water and overall sanitary upkeep.

4.5 Scope of the Project

The scope involved physical on-site deployment across various community junctions, near public monuments, printing presses, and local markets. The initiative directly served local street dogs and wandering cattle, while the food distribution also extended to individuals in need near public spaces.

4.6 Technologies and Tools Used

- **Physical Infrastructure:** Custom-built wooden and tin shelters wrapped in protective tarpaulin.
- **Sanitation & Relief Tools:** Earthen water bowls, heavy-duty water dispensing jars, pre-packed meal containers, brooms, and protective gloves.
- **Digital & Financial Tools:** Scan-to-donate QR codes and social media flyers utilized for fundraising drives.

4.7 System Architecture (Operational Workflow)

1. **Site Identification & Campaign Setup:** Locating accessible areas for shelters and distributing fundraising flyers digitally and locally.
2. **Deployment:** Transporting shelters and earthen bowls to the sites.
3. **Relief Operations:** Distributing packed meals to strays and underprivileged individuals simultaneously.
4. **Maintenance Loop:** Scheduled visits for cleaning bowls, refilling fresh water, sweeping the vicinity, and tracking donation influx.

4.8 Methodology

The work was carried out in coordinated volunteer teams. Upon arriving at a site, the team cleared the area of debris. Earthen bowls were scrubbed, and fresh water was poured. Concurrently, volunteers unpacked and distributed freshly prepared meals to the local stray population. Throughout the process, the team engaged with local vendors to build a decentralized support system and shared the foundation's official fundraising flyers and QR codes to ensure long-term financial sustainability for the mission.

4.9 Expected Outcomes

- A noticeable decrease in heat-related distress and starvation among the local stray population.
- Creation of safe havens protecting animals from rain and direct sunlight.
- A sustained inflow of funds for medical care and nutrition through the newly established community donation drives.
- Increased community empathy and proactive participation in stray animal care.

4.10 Photographic Evidence of Field Work

Below are the documented activities carried out during the internship with the Kalpajyoti Foundation.

Figure 1: Setting up a Street Dog House under the guidance of NGO Founder Sayan Saha.

Figure 2: Establishing a water station near a public monument.

Figure 3: Collaborative water refilling and maintenance.

Figure 4: Deploying water stations near local businesses.

Figure 5: Local stray dog utilizing the foundation's shelter and water station.

Figure 6: Cleaning and refilling operations in residential zones.

Figure 7: Community Engagement with local residents and shop owners.

Figure 8: Securing the shelters with weatherproof materials.

Figure 9: Impact on diverse street animals, providing widespread ecological relief.
